

## **Braille conversion facilities now available in Thane**

The XRCVC-Viviana Extension, as part of its ongoing upgradation of services and offerings to its visually challenged users, is happy to announce the launch of braille conversion facilities in Thane. These services will be available at XRCVC-Viviana Extension from June 27 to celebrate the second anniversary of the XRCVC-Viviana Extension.

Even in today's day and age when accessible technologies are easily available, knowledge of Braille is an extremely potent tool in a visually impaired person's life.

Braille gives blind people a very good option to read books and publications as virtually any type of reading material, both old and new, can be transcribed in Braille.

You are cordially invited to attend the launch of the services at 3.30 p.m at XRCVC-Viviana Extension, 1st Floor, West Court, Viviana Mall.
