

Dear All,

XRCVC is happy to announce an Offline Training on the theme "Google Forms with NVDA."

Google forms is a free online tool and are the most popular product nowadays, extensively used in the educational field, homes, and the corporate world. Its flexibility allows users such as – want to get to know better opinions, surveys of students, clients, and employees. Its suppleness can be extended to track student performance. Companies can learn about their customer's data and personal lives (Eg: health data) by individual. Thus, at various levels one can have their own data gathering and tracking tool that's free and easy to learn with a screen reader.

This training will help you learn how to use, create, and access Google Forms with a screen reader effectively.

Eligibility: participants should have good knowledge of screen reader, Typing, Internet browsing, Fundamentals of G-mail, and Google drive.

Limited seats are available for the session.

Those interested should kindly register by using the link appended below.
